- 25X1A 1. ☐ Comment. Probably military trains.
2. ☐ Comment. The fuel was for the Northern Fighter Corps of the Twenty-Fourth Air Army.
- 25X1A 3. ☐ Comment. Deliveries of construction material for Seedorfheide airfield whose completion was recently rushed.
- 25X1A 4. ☐ Comment. No figures for previous months are available from this railroad district for comparison. After deduction of 841 cars which probably belong to military trains and 2,717 cars which carried construction material, the number of cars loaded for military supply shipments would be 611 cars including shipments from Zerswalde, which is an important supply basis of the Fourth Gds Mocz Army. This confirms the assumption that no important military Soviet supply installations are located in the northern area in East Germany. ☐  
Since only a small number of cars were loaded at Rostock railroad station mentioned in the referenced report as well as the Stralsund railroad station mentioned in the present report, these two Baltic Sea ports handle only insignificant military supply shipped via the Baltic. It is believed that the entire military supply from the USSR is shipped almost exclusively by rail via Brest Litovsk and Frankfurt/Oder.
- 25X1A 5. ☐ Comment. Supply of fuel from the tank depot of the Northern Fighter Corps of the Twenty-Fourth Air Army to fighter regiments subordinate to this corps.
